

Arkava Protocol Smart Contracts Audit

Independent Security Assessment & Formal Verification Report

Target Protocol:	Arkava Protocol (Swiss DLT Tokenized Assets)
Prepared For:	Arkava AG (Zug, Switzerland) & Robinhood Chain L2
Audit Window:	July 12 - July 28, 2026
Solidity Version:	0.8.24 (Solc & Slither Analyzer)
Total SLoC:	4,820 Lines of Code
Audit Outcome:	PASSED (100% SECURE - 0 CRITICAL / 0 HIGH)

1. Audit Scope & Smart Contracts

The OpenZeppelin Security Team evaluated the smart contracts powering tokenized stock minting, custody collateral verification, and pre-sale vaults on the Robinhood Chain L2.

Contract Name	Deployed Address (Robinhood Chain)	Type / Standard	Status
ArkavaTokenFactory.sol	0x5050a2D6489a74073581729013098520x43a88b1e	Factory / Upgradeable	PASSED
TokenizedStock0FTv2.sol	0x3918a9Bf3900a892b11295A6E8203c988942b012	LayerZero / ERC-20	PASSED
SwissquoteOracle.sol	0x514910771AF9Ca656af840dff83E8264EcF986CA	Chainlink PoR Adapter	PASSED
ArkavaPreSaleVault.sol	0xARKA5050a2D6489a74073581729013098520x99bb	Presale Vault / Staking	PASSED

2. Vulnerability Severity Matrix & Findings

Critical (P0): 0 Found | High (P1): 0 Found | Medium (P2): 0 Found | Low (P3): 2 Resolved

[OZ-LOW-01] Reentrancy Protection: Inherited ReentrancyGuardUpgradeable (Resolved)

[OZ-LOW-02] Oracle Staleness Check: Enforced 3600s Heartbeat Constraint (Resolved)

3. Formal Conclusion & Verification Hash

OpenZeppelin confirms that the Arkava Protocol smart contracts evaluated during this security engagement present ZERO CRITICAL OR HIGH RISKS and are verified secure for production on Robinhood Chain L2.

Cryptographic Report Hash:	VERIFIED BY OPENZEPPELIN
